

VNTV

WEBSITE BLUEPRINT

A modern, mobile-first African digital news and video platform

Prepared for: V-Nation TV
Primary brand: @officialvntv

Design direction: premium news • video-first • fast • credible • social-native

1. PROJECT OBJECTIVE

Build VNTV as a professional digital media platform for breaking news, African and international news, politics, business, entertainment, viral stories, original programmes and video. The website must feel like a serious news organisation while being optimised for the social-media audience that already discovers VNTV through Instagram, TikTok and other platforms.

2. BRAND & VISUAL DIRECTION

Element	Direction
Primary colours	Black / white / deep red
Accent	Red used for BREAKING NEWS, live indicators and key buttons
Typography	Bold modern sans-serif for headlines; highly readable sans-serif for body text
Logo	VNTV logo in header, footer and video player overlays where appropriate
Overall feel	Clean, premium, authoritative, modern African media
Avoid	Clutter, excessive animations, tiny text, excessive pop-ups

3. MAIN NAVIGATION

Home | Breaking News | Ghana | Nigeria | Africa | World | Politics | Business | Entertainment | Sports | Viral | Opinion | Video | VNTV Originals

Header should also contain: search icon, live indicator, social icons and a prominent menu button on mobile.

4. HOMEPAGE BLUEPRINT

Order	Homepage component	Purpose
1	Top breaking-news ticker	Fast alerts and urgent stories
2	Header/navigation	Brand, categories, search and menu
3	Hero story	Largest current story with image/video
4	Secondary top stories	3–5 important stories beside/below hero
5	Latest News feed	Chronological rolling updates
6	Video strip	Short-form and VNTV video content
7	Ghana / Nigeria / Africa	Regional coverage
8	World	International coverage
9	Politics	Ghana, Nigeria and international politics
10	Business	Companies, economy, markets and money
11	Entertainment	Film, music, celebrity and culture
12	Viral	Trending social stories and videos
13	VNTV Originals	D'Opinion, Beyond Headlines, documentaries and interviews
14	Newsletter signup	Build owned audience
15	Footer	Links, contact, legal, social and advertising

5. ARTICLE PAGE

Required elements: category label, headline, short summary/deck, author, publication date/time, updated time, hero image, video where available, article body, related stories and social sharing.

News credibility: show author/editor name, source attribution where applicable, correction/update mechanism and a visible timestamp.

Engagement: related stories, most-read stories, video recommendations and newsletter signup.

SEO: unique title/meta description, canonical URL, Open Graph image, structured Article/NewsArticle data, XML sitemap and clean URLs.

6. VIDEO-FIRST SYSTEM

Every article should support an embedded video or related video when available.

Create a dedicated /video section with filters for Latest, Breaking, Interviews, D'Opinion, Beyond Headlines, Documentaries and Shorts.

Video pages should display the video prominently, headline, description, related articles and links to YouTube/TikTok/Instagram.

Allow vertical 9:16 clips as well as horizontal 16:9 videos.

Add VNTV branding/watermark to original videos.

7. VNTV ORIGINALS

Programme	Page requirements
D'Opinion	Show description, presenter profiles, episodes, clips, guest archive, latest episode and subscribe/follow links
Beyond Headlines	Show description, episodes, guests, clips and podcast/video links
Documentaries	Film poster/thumbnail, synopsis, trailer, full video or viewing link
Interviews	Guest profile, interview video, transcript/extracts and related stories

8. ADVERTISING & REVENUE SYSTEM

Homepage: leaderboard banner, in-feed sponsored placement and premium hero sponsorship.

Article pages: top banner, in-content banner, sidebar desktop placement and end-of-article placement.

Video: sponsored video slot and branded VNTV Originals sponsorship.

Direct sales: create an Advertising page with VNTV audience statistics, formats, contact email and media-kit download.

Ad management: developer should build ad slots so banners can be changed from the CMS without editing website code.

9. CMS / ADMIN DASHBOARD

Admin users must be able to create, edit, schedule and delete stories.

Fields: headline, slug, category, subcategory, author, featured image, gallery, video URL, excerpt, body, tags, SEO title, SEO description, social image and publication date.

Support breaking-news flag, featured story flag and sponsored-content label.

Media library with image compression, alt text and reusable assets.

User roles: Super Admin, Editor, Reporter/Writer, Video Editor and Advertising Manager.

Ability to schedule posts in advance and update breaking stories without changing the URL.

10. MOBILE EXPERIENCE

Design mobile-first. Most VNTV traffic is expected to come from Instagram, TikTok, WhatsApp and mobile browsers.

Homepage should load quickly on 4G/5G and lower-bandwidth connections.

Use responsive images, WebP/AVIF where supported, lazy loading and caching.

Mobile header should contain logo, search and hamburger menu.

Avoid intrusive pop-ups and excessive advertising that blocks the article.

11. TECHNICAL REQUIREMENTS

Area	Requirement
CMS	WordPress or a modern headless CMS; developer to recommend based on scale
Frontend	Fast responsive framework/theme with clean reusable components
Hosting	Managed cloud hosting with CDN and automatic backups
Security	SSL, firewall/WAF, malware protection, 2FA for administrators
Performance	Caching, image optimisation, lazy loading and CDN
Analytics	Google Analytics 4, Search Console and social referral tracking
SEO	XML sitemap, robots.txt, schema, canonical URLs and Open Graph
Search	Fast site search with filters by category/date
Backup	Automated daily backups plus restore capability
Email	Newsletter system and transactional email configuration
Social	Easy sharing to WhatsApp, Facebook, X, Telegram and copy-link

12. LEGAL / EDITORIAL PAGES

Create dedicated pages for About VNTV, Contact, Editorial Policy, Corrections Policy, Privacy Policy, Terms of Use, Cookie Policy, Copyright/DMCA contact and Advertising/Sponsorship. The site should clearly label sponsored content and distinguish editorial reporting from paid advertising.

13. SOCIAL MEDIA INTEGRATION

Official handle: **@officialvntv**. Add social links in header/footer and social sharing on articles. The website should make it easy for visitors to follow VNTV and watch the original video on the platform where it was published.

14. RECOMMENDED URL STRUCTURE

vntv.com/ghana/

vntv.com/nigeria/

vntv.com/africa/

vntv.com/world/

vntv.com/politics/

vntv.com/business/

vntv.com/entertainment/

vntv.com/viral/

vntv.com/video/

vntv.com/opinion/

vntv.com/originals/

vntv.com/d-opinion/

vntv.com/beyond-headlines/

15. DEVELOPMENT PHASES

Phase	Deliverables
1. Design	Brand system, homepage, article page, category page, video page and mobile UI
2. Build	CMS, frontend, article system, media library, search and categories
3. Monetisation	Ad slots, advertising page, sponsorship labels and media-kit area
4. SEO & Analytics	Schema, sitemap, Search Console, Analytics and social tracking
5. Testing	Mobile, desktop, speed, security, forms, sharing and broken-link testing
6. Launch	Production deployment, SSL, backups, monitoring and admin training

16. DEVELOPER ACCEPTANCE CHECKLIST

- Website is fully responsive across phone, tablet and desktop.
- Editors can publish a complete article without developer assistance.
- Breaking-news stories can be flagged and displayed prominently.

- Images are compressed automatically and have editable alt text.
- Every article has SEO and social-sharing metadata.
- Video embeds work on mobile and desktop.
- Ad positions can be managed without code changes.
- Analytics and Search Console are connected.
- Admin accounts use strong passwords and 2FA.
- Automatic backups and restore procedures are configured.
- Page speed is tested before launch.
- All legal/editorial pages are present.
- The website and database are handed over to VNTV with full admin ownership.

Developer note: This blueprint defines the product direction. Before development begins, provide VNTV with desktop and mobile UI mockups, sitemap, technical stack recommendation, estimated timeline, hosting specification and a fixed development cost. Do not begin from a generic news template without first presenting the proposed VNTV design.
